June 4 2020

Glyphosate renewal dossier submission – follow-up, your letter dd April 8, 2020

Dear [REDACTED],

Thank you for updated letter and keeping us informed.

Herewith we confirm our earlier email-response (April 14, 2020) to your above-mentioned letter, which is reproduced below for your convenience.

“From Appendix 1 in your letter we understand that four of the studies may potentially be delayed, and we also note that the preparation of the ecotox risk assessment is currently behind schedule. At this stage it is difficult to have a clear picture on the implications for the dossier and whether or not the situation will be manageable for the AGG but we trust that you will keep us informed on the progress.

Regarding the preferred format for submission (Knoell’s e-mail dd 6 April) each member of the AGG will respond individually within short time.

The proposed format for compilation of the comparison with the CLP criteria is indeed not a formal requirement, the AGG will provide a response to Knoell’s suggestion (e-mail 31 March) as soon as possible.”

Best regards,  
On behalf of the Assessment Group for Glyphosate,

[REDACTED]
